

IN THE SPECIFICATION:

Please amend paragraph [0041] as follows:

FIGS. 13A and 13B are diagrams showing shift patterns of the shift lever in an embodiment of the present invention and in a comparative example;

Please amend paragraph [0135] as follows:

Operation of the differential lock lever 37 causes the lock member 182 to slide. Claws 182a, 182a of the lock member 182 are ~~connected to~~ engageable with a laterally protruding portion 83a formed on the third driven sprocket 83. ~~The 83 thereby causing the~~ left axle 13a and the third driven sprocket 83 to rotate together. That is, the left axle 13a and the right axle 14a rotate ~~in~~ as a unit.

Please amend paragraph [0146] as follows:

The working slot 197b allows the shift lever 36 to be moved to a working ~~n146eutral~~ neutral position 36E (position N in the working slot), a working first gear position 36F (position 1 in the working slot) and a working second gear position 36G (position 2 in the working slot), which are sequential from the left.
